

# EMINENT GOLD

## PURSUING MAJOR GOLD DISCOVERIES IN THE GREAT BASIN

- Breakthrough Intercept – **9.2m @ 3.2 g/t Au**
- Early Evidence of a New Carlin-Style Trend
- 10,000m Drill Program Set to Begin
- Team Behind a 5 Moz Gold Discovery
- Three 100% Owned Projects
- Kinross Gold Corp. Holds **13.8%**
- Management **18%**

“HSRP is the first new Carlin-style system of this scale identified in Nevada in decades.” – **Dan McCoy, CEO**

### Flagship Project | HSRP

- 10 km corridor of highly-prospective targets remain untested
- Favorable oxide gold mineralization in every completed drill hole
- **HSC002**: up to 8 g/t Au    **HSC005**: confirms second mineralized fault
- Current drilling area open in all directions with numerous untested structures
- Drilling planned to systematically test faults and advance discovery

### Corporate Leadership

**Dan McCoy** PhD – CEO & Chief Geologist, Director  
**Justin Milliard** PhD - VP Exploration  
**Ivan Bebek** – Strategic Advisor, Corp Dev & Finance  
**Martin Bajic** – CFO  
**Michael Bebek** – Head of Communications

### Board of Directors

Dan McCoy - CEO & Director | **Paul Sun** – Director | **Michael Kosowan** – Director | **Ann Carpenter** – Director

### Capitalization May 4, 2026

<b>Issued &amp; Outstanding</b>	<b>82,510,970</b>
Options	5,741,667
Warrants	18,482,971
Fully Diluted	106,735,608

# HOT SPRINGS RANGE PROJECT

## Advancing Exploration of a Newly Identified Carlin-Style Gold System

**Legend**

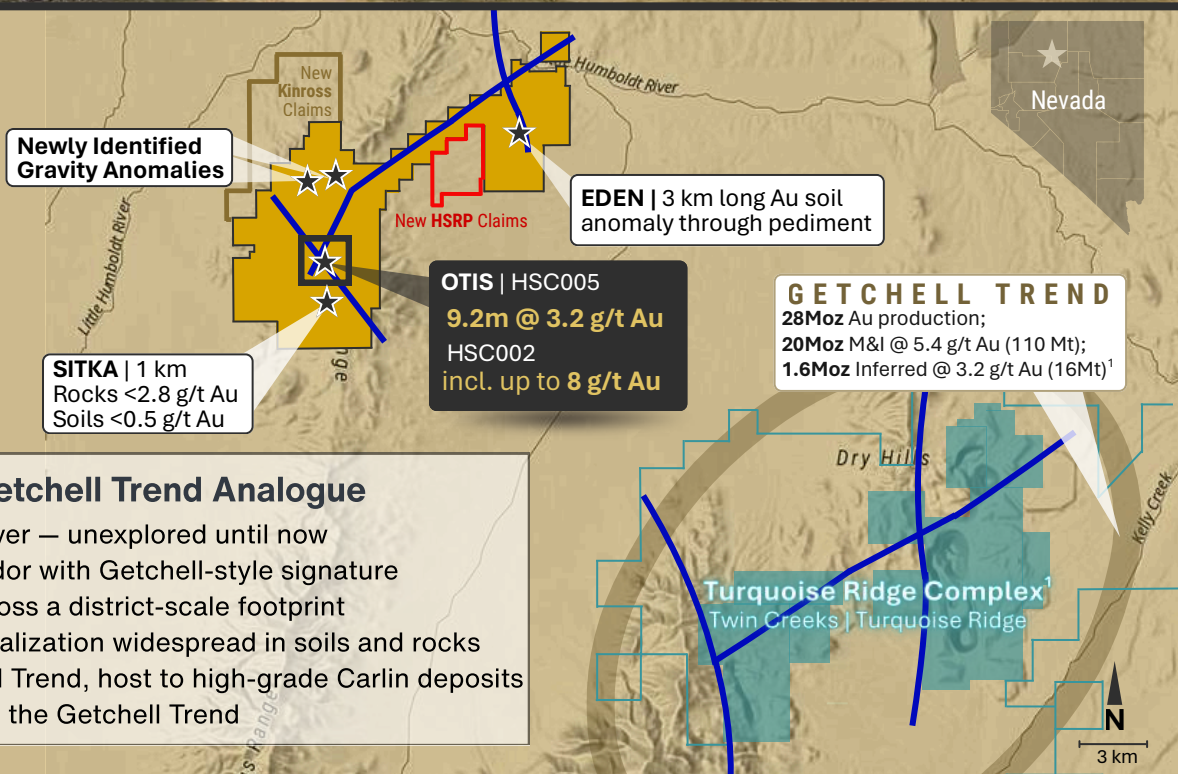

- ★ HSRP Target Areas
- Fault
- NGM Exploration Claim Plan of Op.
- Barrick Nevada Gold Mines Claims
- HSRP Claims

*all boundaries are approximate*

**Analogous Geochemistry**

	HSRP	Getchell
Au (g/t)	0 - 0.7	0 - 0.5
As (ppm)	1 - 2,400	50 - 1,000
Hg (ppm)	0.005 - 96	0 - 0.5
Sb (ppm)	0.06 - 1,400	5 - 50

Similar pathfinder signature to Getchell Trend deposits

### Hot Springs Range | Getchell Trend Analogue

- Hidden under shallow cover — unexplored until now
- 10+ km Carlin-style corridor with Getchell-style signature
- Five untested targets across a district-scale footprint
- All holes hit gold — mineralization widespread in soils and rocks
- 15 km NW of the Getchell Trend, host to high-grade Carlin deposits
- Fault architecture mirrors the Getchell Trend

### Significant Gold Intercepts | Otis

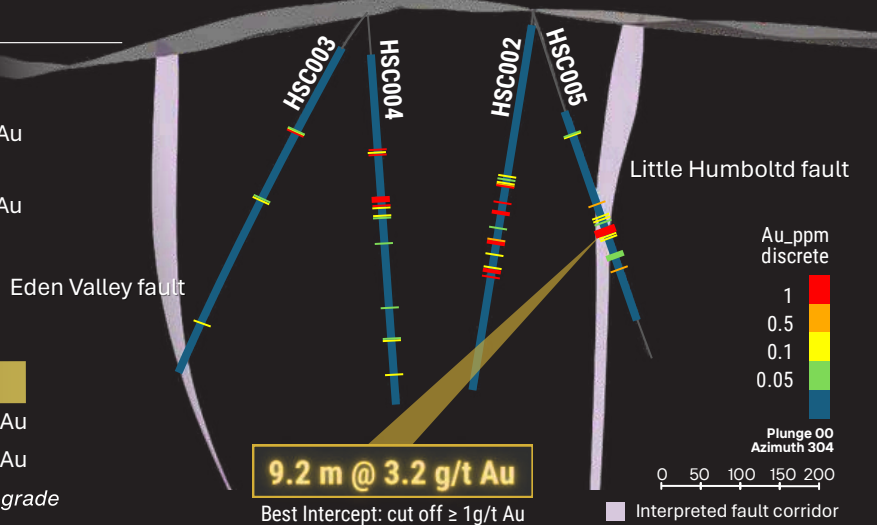

Completed Core Holes

Hole ID	From (m)	To (m)	Width (m)	Au (g/t)
HSC002	272.8	275.7	2.9	2.2
HSC002	310.4	314.3	3.9	2.4*
			incl.	0.5m @ 8.0g/t Au
HSC002	347.1	351.7	4.6	1.4*
			incl.	0.9m @ 4.4g/t Au
HSC003	178.4	180.9	3.6	0.4
HSC004	178.6	186.5	7.9	1.2
HSC004	239.5	243.5	4.0	2.4
HSC004	250.9	254.2	3.3	0.5
HSC005	295.50	304.74	9.2	3.2
			incl.	0.9m @ 5.4 g/t Au
			incl.	1.1m @ 4.6 g/t Au

Up to 8 g/t Au intersected — system capable of delivering high-grade  
All mineralized zones align with interpreted faults

### All Holes Intersect Oxide-Type Gold Mineralization

Cross-Section Looking NW

### More shots on Discovery: In the prolific Walker Lane Trend

#### Celts Project | AngloGold Silicon Analogue

Highlights:

- Identified by the Silicon discovery team
- Surface samples to 33 g/t Au
- Identical feeder geometry to Silicon's mineralized zone
- Permitted | Drilling Q3

#### Gilbert South Project | High-Grade Vein System

Highlights:

- Up to 31 g/t Au in surface rocks
- Multiple vein corridors (1.5–2.5 km strike)
- Historic values reported to 143 g/t Au
- Historic shallow drilling chased heap leach gold
- Feeder untested | Drill Ready
