See why Kinross backed Nevada's emerging gold discovery.

EMINENT GOLD

Drilling for Nevada's Next Major Gold Discovery

Team Behind a 5 Moz Gold Discovery
Kinross Gold Corp. Holds 13.8%
Management 18%

Hot Springs Range Project | HSRP | Actively Drilling

Eminent is the first company to drill this 10 km corridor for gold. The project sits ~15 km from the Getchell Trend. Drilling has confirmed Carlin-style mineralization under shallow cover in a similar structural setting to the Turquoise Ridge Complex.

Drilling highlights to date:

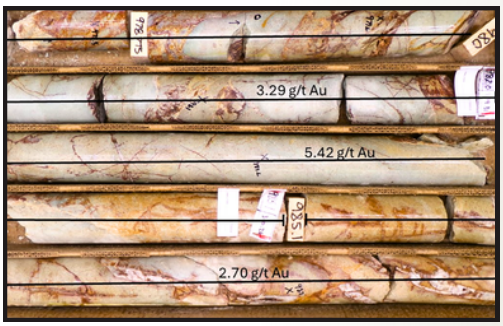

Phase 1 Core Drilling grade — (HSC005 9.2m @ 3.2 g/t Au)
Phase 2 RC Drilling thickness — (HSR2601 57.9 m @ 0.3 g/t Au ending in 3.0m @ 2.1 g/t)

Otis currently drilling the upper halo of a broad mineralized zone

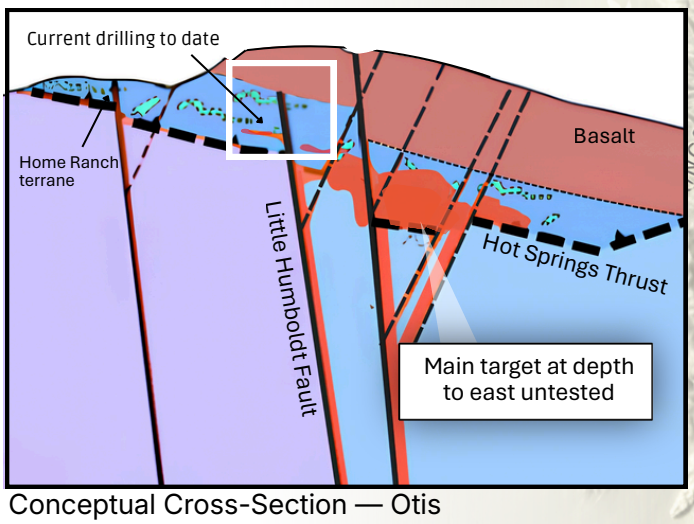

- Depth remains untested

Eden defined by a 3km long soil anomaly

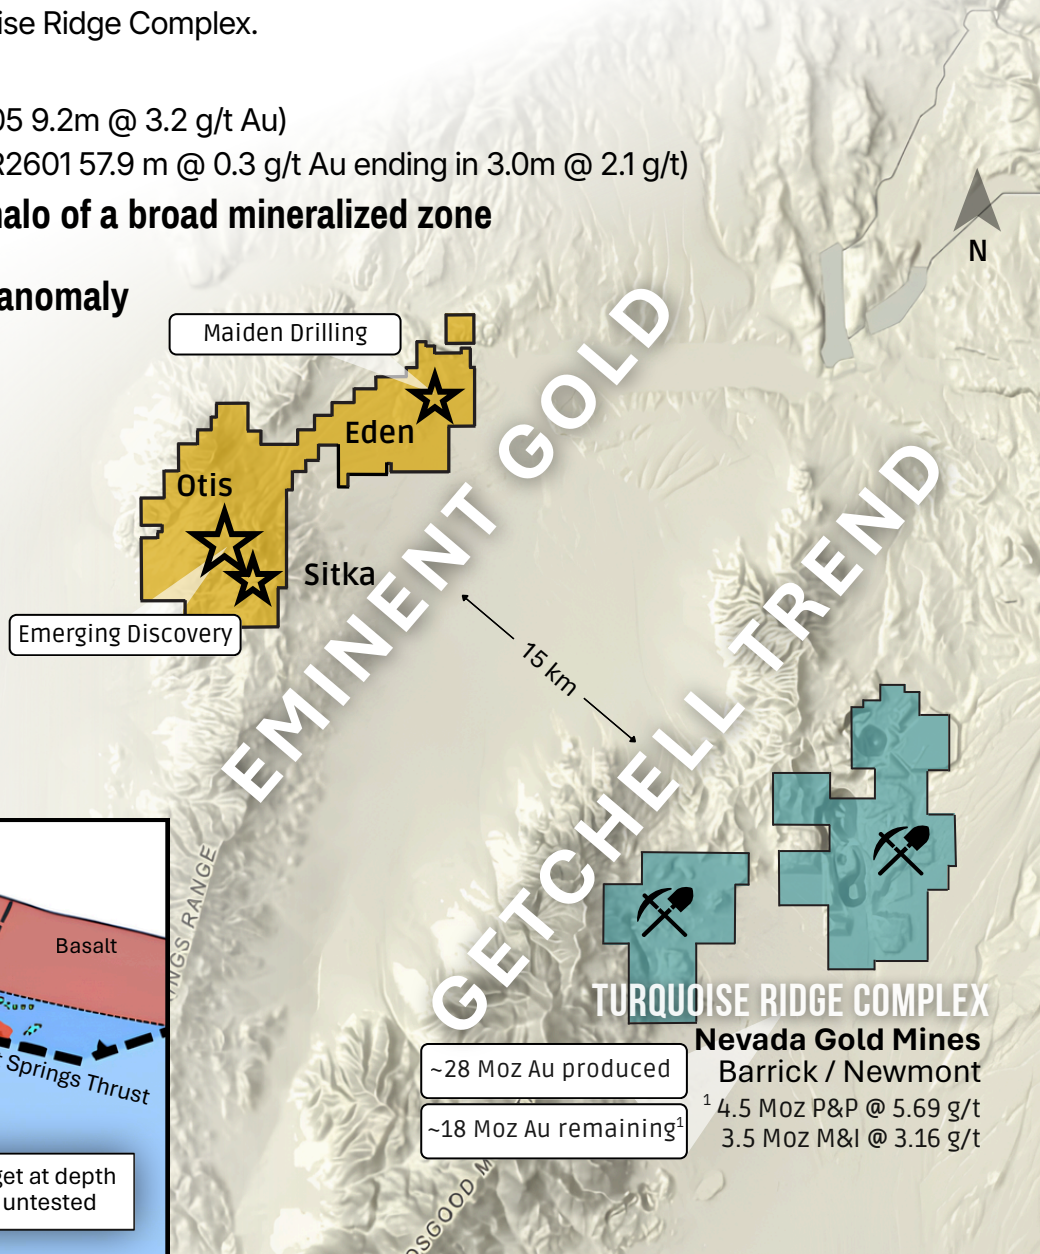

- Untested — first holes this fall

Oxide gold in core — Otis

Conceptual Cross-Section — Otis

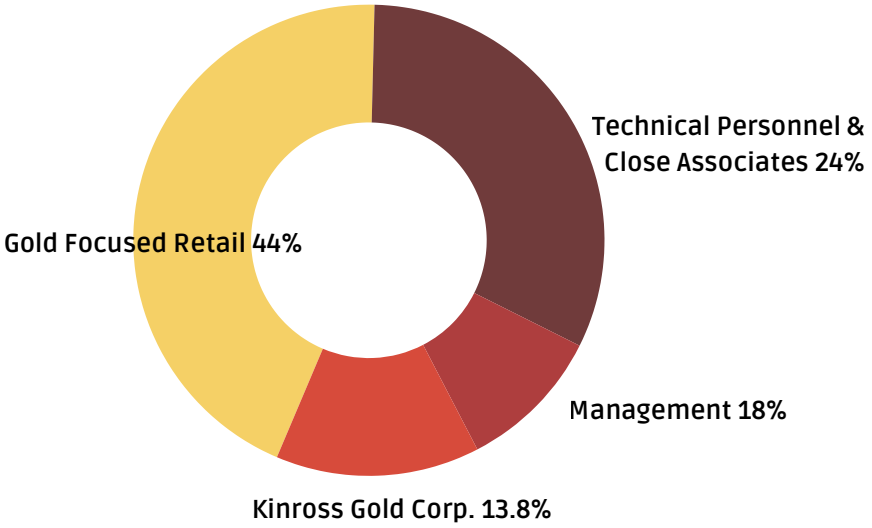

Getchell ounces and the Turquoise Ridge analogue: adjacent deposits are not necessarily indicative of HSRP.

NEVADA

3 Projects | 100% Owned | 6,401 Ha | Drill Ready

Hot Springs Range Project (HSRP)

Drilling pending core rig arrival

Expanding a discovery analogous to Turquoise Ridge and inaugural test of Twin Creeks analogue.

Celts Project

Drilling 2027 Q1

Exploring a direct analogue to ~15.7 Moz[1] — AngloGold Ashanti's Arthur Gold Project, Silicon and Merlin.

Gilbert South Project

Drilling 2027

Targeting the feeder source of gold-bearing veins at surface.

[2] Arthur Gold Project, Silicon: 3.4 Moz measured and indicated at 0.9 g/t (122 Mt) and 0.8 Moz inferred at 0.7 g/t (38 Mt). Merlin: 12.1 Moz inferred at 1.1 g/t (355 Mt). AngloGold Ashanti. This mineralization is not necessarily indicative of mineralization at Celts.

Why Eminent today?

HIGH-IMPACT DRILL PROGRAMS ARE ABOUT TO START

- Multiple near-term catalysts
- Clear analogues to major Nevada systems
- Tight ownership + Kinross strategic investor 13.8%
- Results expected from Otis, Eden & Celts
